BS Software Engineering
University of Engineering and Technology, Lahore

09/2017 - 05/2021 *3.5/4.0*

Courses

- Python
- Deep Learning
- Cloud Computing
- Project Management
- Logic Design
- DBMS

Online Courses
Coursera

Courses

- IBM Full Stack Developer
- Django Developer
- Meta API Master
- Nods JS Developer

SKILLS

Python | Javascript | DBMS | Query DSL | HTML | CSS | React Native | Nodes JS | Django DRF | Django MVC | Self Motivation | SQL | No SQL | API Development | Git | Cloud Computing | CI/CD | Odoo | Data Analysis | Web Automation | Debugging | Problem Solving | Leadership | Team Managment | Project Management

ACHIEVEMENTS

SAP Project
I am continuously indulged in the development and improvement of SAP which target to to have all on boarding and off boarding of employees with automation of their Active Directories, emails and access etc.

Analytical Dashboards
I have successfully created smart analytical dashboards for top notched Australian companies which also include International Towers of Sydney. Moreover, I have also included GPT to those dashboards.

Database Drivers
I have created drivers to get data from client-side databases which include both SQL and NoSQL databases and also the APIs; so that the data should be unified in one place.

REST APIs
Created some REST APIs to communicate with web front ends as well as give some smart insights about current status of BMS equipments.

CERTIFICATES

Full Stack Developement
IBM: By Coursera

API Development
Meta: By Coursera
